Summary

Product marketing and growth leader specializing in helping SaaS, emerging tech, digital media, and Fortune 500 consumer companies build and scale AI-driven go-to-market (GTM) engines that connect product, customer insight, and revenue outcomes. I bring a rare combination of product marketing, growth leadership, and hands-on product strategy—embedding PLG and lifecycle optimization directly into the product experience. I partner with Product, Engineering, Sales, and Operations teams to translate complex technologies into clear, high-impact value propositions that accelerate adoption and long-term customer value. I'm equal parts strategic, analytical, and creative—a tenacious problem-solver who cuts through noise, focuses teams on what matters, and isn't afraid to roll up my sleeves to get things done. I also care deeply about how teams operate—fostering collaborative, high-energy environments where people are empowered to do their best work.Selected Impact:- Scaled a multi-platform digital marketplace from $0 to 8-figure annual revenue—improving marketing efficiency (MER) by 47% through AI-driven, full-funnel GTM strategy.- Increased product activation and premium feature adoption by 20% for a growth-stage patient engagement and practice marketing SaaS startup by embedding lifecycle strategy, onboarding optimization, and product-led growth into customer experience.- Launched the first CPG-branded native iPhone and Android apps, achieving Top 5 Lifestyle ranking in the Apple App Store, ~90% CRM opt-in, and Ad Age / Clio recognition.- Delivered 77% revenue growth in med-tech by redefining go-to-market strategy—launching targeted acquisition programs for high-value demand.- Led streaming, mobile, interactive TV, ecommerce, UGC, and second-screen initiatives for Warner Bros., Disney/ABC, Sony Pictures Television, CBS, CNN, Discovery, HSN, Kraft, Nestlé, GSN, and G4, including ABC's National Bingo Night TV show digital experience, driving 3M+ pre-premiere card downloads.A consistent through-line in my career has been digital product innovation—

influencing how break-through products are positioned, experienced, and adopted. I’m focused on helping the next generation of AI-driven products accelerate growth in increasingly complex, signal-constrained ecosystems where precision, experimentation, and brand storytelling must work together to drive measurable results.
